PROFILE

Self-taught Full-Stack Developer passionate about delivering fast, secure, and reliable web solutions. Dedicated to simplifying developers' lives through performance improvements, workflow automation, enhanced security, and boosted team efficiency. Quick learner, collaborative team player, and committed to writing clean, maintainable code.

WORK EXPERIENCE

Full-stack Developer

03/2024 – Present

ThinkStorm

Remote

- Developed Redis-based rate-limiting and caching layers, improving API response speed by over 30%.
- Implemented JWT authentication and managed secrets securely in GitHub Actions and Docker, ensuring best practice compliance.
- Designed and maintained CI/CD pipelines with Jest integration, reducing deployment failures by 80%.
- Mentored junior developers, accelerating their onboarding and improving team delivery pace.

Full-stack Developer

07/2023 – 03/2024

Sherpasoft

Seoul, South Korea

- Initiated internal process overhaul, cutting down weekly meeting time from 2 hours to 1, saving 210+ person-hours/month.
- Pitched both ActiveMQ and Kafka after technical evaluation; recommended Kafka based on compatibility with the company's architecture, with implementation planned for a future phase.

Full-stack Developer Intern

06/2023 – 07/2023

Allra Fin-Tech

Gangnam District,

Seoul, South Korea

- Rebuilt a mock payment system using JSP and Spring Data JPA within a 1-month sprint, incorporating feedback from senior developers to enhance system understanding.
